

Custom Theaters

Cinergy Construction is a professional builder of custom theaters and screening rooms of any size and specification; in-home, at your studio, or in a dedicated structure.

At Cinergy Construction, we work with leading theater designers, AV dealers, acoustic consultants, and fabric and seating providers to build complete theaters from the acoustic shell to the high-end finishes.

We use acoustic modeling and analysis to create a custom theater with a science-based acoustic layout. The result is the richest immersive sound performance design customized to your room capacity, seating layout, and theater configuration.

We take responsibility for the entire project, and act as your one point of contact. Cinergy will manage everyone involved with the project and track and confirm all decisions required to complete the theater exactly as specified.

WHAT WE CAN PROVIDE

- ▶ Complete Design Services
- ▶ End-to-End Construction
- ▶ Custom Finishing in All Materials
- ▶ Project Management

We are happy to work with the team that you have in place, or if you need us to put together the right team of experts for the project, we will assemble the best in the business in design, manufacture, and materials.

Our expertise encompasses all aspects of a theater build:

DESIGN

- ▶ Soundproofing & Acoustic Isolation
- ▶ Acoustic Design & Modeling
- ▶ Seating Layout & Sightlines
- ▶ Interior Design & Finishes
- ▶ AV & Technical Designs

CONSTRUCTION

- ▶ Seating Platforms
- ▶ Electrical, Lighting & HVAC
- ▶ Framing, Drywall & Finishes
- ▶ Acoustical Panels
- ▶ Acoustic Shell
- ▶ Stretched Fabric Walls & Ceilings

FINISH

- ▶ Cabinetry & Millwork
- ▶ Paints, Plasters & Metals
- ▶ Hidden Doors & Compartments
- ▶ Snack Bars & Lobbies
- ▶ Carpet & Flooring

PROJECT MANAGEMENT

Whether we work with your team or with designers and integrators that we bring together, Cinergy acts as your one point of contact and provides a complete turnkey solution for your project.
