

Secure Environments

High-security construction encompasses much more than safe rooms or attack-resistant doors. We are the experts in hidden safe rooms, security-reinforced everyday rooms, and whole-home security solutions.

Security is not one-size-fits-all. Different properties, uses, and owners may need:

- ▶ **Standard Safe Rooms**
Hidden behind concealed doors, to be used only in emergencies
- ▶ **High-Use Rooms**
Spaces hidden in plain sight, such as home offices or theaters
- ▶ **Entire Properties**
Fortress-level protection as an all-encompassing lifestyle

CONSIDERATIONS FOR SECURE ENVIRONMENTS

Is the space intended to address a specific threat to the owner such as targeted crime, or a general threat, like opportunistic crime or severe weather?

Does the owner need basic protection against forced entry, or ballistic reinforcement to protect against 9mm-or-higher caliber weapons?

Will the room be upgraded to include protection against fire?

EXPERT PARTNERS

Depending on the level of threat and the allotted budget, we may bring in a top-tier security partner to consult on design and sign off on final schematics.

TURNKEY OVERSIGHT OR CONTRACTOR SERVICES

Our capabilities are broad, and our involvement can be varied. We can provide a full turnkey solution, acting as your single point of contact from start to finish to coordinate design, bring in specialized experts, and self-perform the room or property buildout. Or we can take the lead from another party and build from provided designs.

In either case, we provide our own shop drawings to ensure constructability and adherence to design and budget specifications.

CALL ON US FOR AN EXPERT CONSULTATION

We are available for a phone call, plan review, or site visit, either virtual or in-person.
